Project Growth - Burn Down Chart

Burndown Chart on Jira:

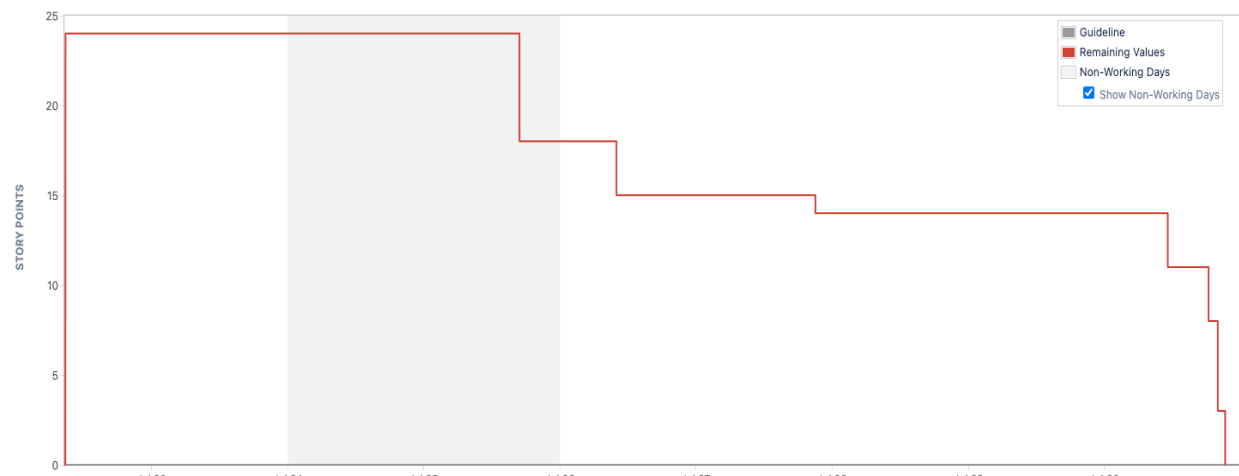

Observations:

1. Unfortunately the optimized line could not be displayed, or say it was already been displayed but it is a flat line at the bottom of the chart. Reason for this is we started the sprint before adding all the story points.

2, The delivery of some issues are delayed because team mates are focusing on other priorities like tests and assignment 2.

3, We were able to close all issues on time.
